PROFILE

I'm a full stack web developer skilled in React, Next.js, and FastAPI. I enjoy creating responsive websites and understanding how everything functions behind the scenes—from frontend interfaces to backend APIs. During my training, I worked on real-time projects that gave me hands-on experience. I'm now looking for a chance to join a company where I can continue learning and grow as a developer.

EDUCATION

New Tech Skills Academy, Jaipur, Rajasthan
Full Stack Web Development — 2024 – 2025

Sri Karan Narendra Agriculture University, Jobner, Jaipur, Rajasthan
B.Sc. (Hons) Ag and MBA (Agribusiness Management) — 2019 – 2024

SKILLS

Programming Languages: JavaScript, Python, SQL
Frameworks & Libraries: React, Next.js, FastAPI
Database: MySQL
Tools & Platforms: Postman, Stripe, Google Cloud Platform (GCP), Render, Git, Excel, Word
Others: REST APIs, Responsive Design, Version Control (Git/GitHub)

PROJECTS

DryMate – Organic Mushroom Farming Website (Apr 2025 – Jun 2025)

-Designed and developed a brand website for DryMate to showcase mushroom products, accept orders, and manage training programs.
-**Tools/Frameworks:** FastAPI, Next.js, SQL, Tailwind CSS, Stripe.
-Enabled users to browse organic products, place orders, and enroll in hands-on mushroom farming training sessions.
-Integrated a clean UI for customers and admin tools for product, order, and training management.

Gym Membership Web Platform (Feb 2025 – Apr 2025)

-Built a fully responsive gym website offering subscription plans, facility overviews, trainer profiles, and class schedules.
-**Tools/Frameworks:** FastAPI, Next.js, SQL, Stripe, Render

-Developed a user-friendly subscription system with secure payments via Stripe and authentication for member-only features.

-Implemented admin dashboard for managing trainers, classes, and schedule updates in real-time.

E-commerce Web Application (Dec 2024 – Feb 2025)

- Developed a full-featured e-commerce website with user authentication, product browsing, cart, and order management.
- Tools/Frameworks: FastAPI, Next.js, SQL, Stripe, Render
- Implemented secure login/signup, dynamic product pages, and responsive UI.
- Integrated Stripe for seamless payments and FastAPI for robust backend APIs.

Bus Ticket Booking Platform (Oct 2024 – Dec 2024)

- Built a web app to search, book, and manage bus tickets with real-time schedule updates and admin panel.
- Tools/Frameworks: FastAPI, Next.js, SQL, Stripe
- Designed interactive booking flow with seat selection and email confirmation.
- Created REST APIs for trip schedules, ticket booking, and cancellations.
- Enabled admin control over route management and passenger logs.
